

MEDI-VOICE

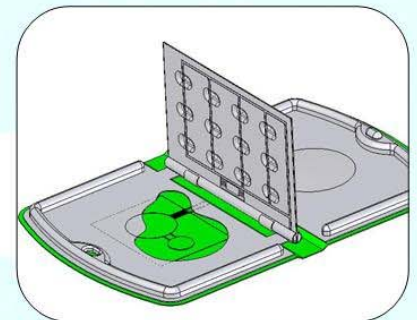

Development of **Low Cost, Smart Pharmaceutical Packaging** to Service the Needs of **Blind, Illiterate & Elderly**

An estimated **200,000 deaths** in the E.U. due to miss-dose & non-compliance of medication.

Non-compliance costs the E.U. an estimated €125 billion annually.

Printed instructions are meaningless to around 20% of E.U. due to illiteracy. This figure, combined with 8 million blind and partially sighted people and the increasing ageing population, is contributing to deaths annually.

Low Cost device enabling spoken medication instructions and compliance monitoring through novel manufacturing processes.
